

Clark Forklift

Clark Forklift Forklift Training - At present, there are at least 350,000 Clark forklifts performing worldwide, and more than 250,000 in service in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 specific components designed for 20 exclusive models of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your parts needs offered by Clark Totalift.

Clark's extraordinary Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance.

Internationally, Clark has one of the most amazing dealer support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of commitment to their clients predominates the materials handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is currently a standard feature on every forklift.

Clark has a relentless mission to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its manufacturing plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any environmental limitations, thus placing them in a dominant industry position.

Lean Manufacturing

Clark has selected the system of "Lean Manufacturing" at all of its assembly plants because this system is particularly economical and permits minimal use of resources. Developed to ensure maximum proficiency, this system is designed to find and acknowledge the most effective methods for production facility stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engineering

Clark's product engineers and suppliers communicate together to improve the proficiency and brilliance of their products while minimizing costs. The contemporary value engineering agenda combines innovative product development and delivers improved client support and service within the industry.
