

Boom Lift Training Oshawa

Boom Lift Training Oshawa - Elevated work platforms, also known as aerial platforms, allow workers to perform jobs at heights which would otherwise be inaccessible. There are various kinds of lifts designed for various site applications and conditions. If operated carelessly, elevated work platforms could lead to death or serious injury. The most common reasons for related accidents are falls, electrocution, tip-overs and crushed body parts. Lift operators must be completely trained in procedures in order to prevent accidents during the operation of lifts.

Aerial Lift Safety course is designed for people who need to operate the devices more safely and effectively. The program provides thorough instruction about the most used lifting devices in the industry.. Kinds of lift covered consist of articulating, boom supported and scissor aerial lifts. The video presents the correct methods operators must follow. Instruction focuses on protection against falls, pre-operational inspection, stability of the device and safe driving procedures.

The course addresses equipment reliability and employee safety. All instructional materials are compliant with government, provincial and state agency regulations and requirements. Training techniques and course management would be taught. The trainer will likewise know the technical aspects of aerial lift safety.

Both classroom training and practical training are components of the Aerial Platform/Boom Truck Training program. Both sessions must be successfully finished for the participant to be given a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms could be positioned totally beyond the base of the machinery. The theoretical component of the training is practically the same for both types. The practical training part could be completed more quickly if just one kind of equipment is utilized.

Elevating Work Platform Training Program Objectives:

Aerial Platform/Boom Lift Training provides competency requirements for safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms (for use on paved/slab surfaces). Training will help operators to efficiently use elevating work platforms whilst decreasing the chances of a costly accident in the workplace. Trainees will review of company policies and applicable rules, talk about Due Diligence, study Criminal Negligence and consequences to trainers, employers, employees and supervisors. Participants will study machine features, stability, operating procedures, parking and fueling/charging procedures. Site-specific safety matters would be dealt with.
