

Boom Lift License Oshawa

Boom Lift License Oshawa - In order to operate an aerial boom lift, operators must be certified through training that could be obtained using both practical training and classroom sessions and by attaining a boom lift license. Instruction must be given with respect to the type of aerial lift which will be utilized on the job. A License is needed for any individual who operates or works on an aerial boom lift.

Vehicle-mounted aerial devices comprise the following work vehicles: extensible boom platforms, aerial ladders, articulating boom platforms, vertical towers, and any combination of these types.

When using a boom lift, there are several basic safety rules that apply to all boom lifts. Safety of the worker is a main concern while they are working in the basket. The worker must always wear a body harness and lanyard, connecting it to the basket or boom. Never tie off to an equipment, an adjacent pole or a structure. Employees must stand on the basket floor, and never sit or climb on the edge of the basket. The load limits of the manufacturer should be adhered to.

Aerial lift operators must be authorized to make use of the machinery. The operator needs to be familiar with all the aspects of the device and must have access to the manufacturers instruction manual which should be kept within the lift. Operators are responsible for making certain that safety measures are followed in operating the lift. Testing lift controls each day should be done. Set brakes and position outriggers (if they are used) on a stable surface or on pads. When working on a slope, utilize wheel chocks.

The aerial lift vehicle should never be moved while a worker is in the basket of an elevated boom, unless they are using machines which are specifically designed for this. Articulating boom and extensible boom platforms used as personnel carriers must have plainly marked, accessible, upper controls. Except for in emergency conditions, lower controls should not be utilized to override upper controls unless the individual within the lift gives consent.

Do not wear tree or pole climbers shall while working from an aerial lift.

The insulated part of the aerial lift must not be altered.

Do inspect the booms to ensure it is correctly cradled and the outriggers are in the stowed position before moving.

Make certain that lifts being utilized near or in power lines are di-electrically tested and conform to local regulations.
